* Start time and distance partly estimated

‡ Worked out from the nearest odometer reading and the drives recorded in between, not read off the dash.

Everything together

Distance from your shifts	1,163.00 km

Distance from detected drives	2,769.47 km
Total distance	3,932.47 km
Odometer distance for this period	4,055.00 km
Distance driven for business	3,552.76 km
Private distance (the distance above less business)	502.25 km
Of which: drives not filed as business	379.71 km
Of which: driving the app did not record	122.53 km
Business-use percentage for the logbook period	87.6%
The odometer shows driving in this period that the app did not record. The odometer readings worked out for each drive assume every use of the car was recorded, so some may not match what the dash read at the time.	

Changes to entries in this period

A drive, shift or odometer reading can be corrected freely for a week after it is recorded. Every change made after that is listed here with what the entry said before it, and an entry deleted after that week is listed with what it recorded.

No entry in this period was changed after its first week.
